Doctors in the ruins of the hospital in Kherson

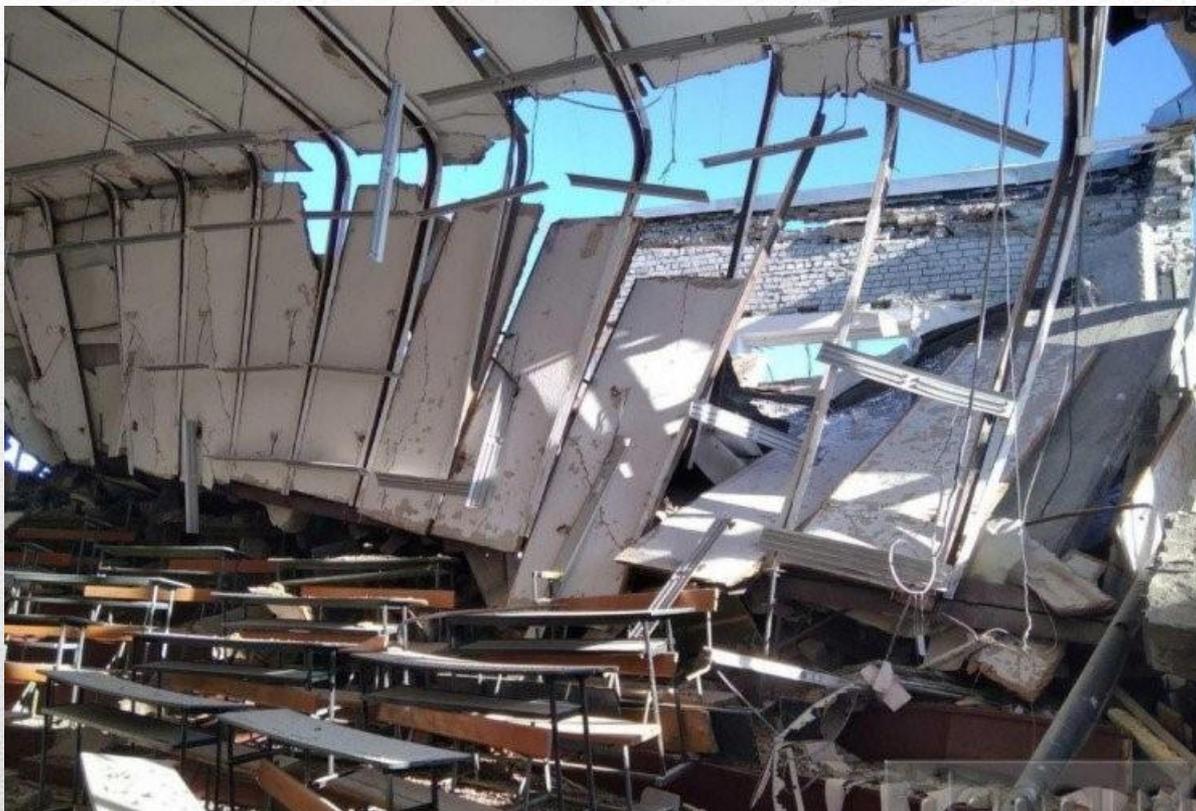

**Ukrainian doctors observe childbirth and operate in shelters !
During Russian missile attacks children are born in shelters in XXIth
century in Europe!**

Reality

- **impossibility to visit a family doctor or get help online**
- **increase in heart attacks and strokes among people ages 40 -45**
- **complicated laboratory tests, planned operations, supportive therapy**
- **a decrease in number of screenings, so oncology is diagnosed at late stages**

Perspectives

- **increase in lung diseases, tuberculosis due to staying in dark, cold, wet rooms and unbalanced diet**
 - **14 million Ukrainian need psychological help**
 - **increasing self-medication, abuse of painkillers and sedatives**
-

Russia is targeting missile strikes on educational institutions!

on the trenches**

**Shelter at the Danylo Halytskyi Lviv National Medical University,
where Rector elections were held on April 19, 2024**

To protect against Russian attacks, the elections were held in shelter

- **60.000 people per day – women, children and the elderly arrived to Lviv in spring 2022. All of them needed the help of psychologist and doctor**
- **Employees of our University joined the volunteer association “Medical and psychological help” and were constantly on duty at the railway station: they stopped panic attacks, gave advice, medicine, referred to hospitals. Students assisted them and looked for the children so that their mothers could get some sleep**

Railway station in Lviv in the spring of 2022

Volunteer association on Lviv railway station and its psychologist Olga Shved who is on duty at night and on weekends because she teaches students during the day

- **Our doctors cooperated with their colleagues from Poland and other countries**
- **Doctors conducted the necessary examinations, restored medical history, psychologists stabilized the emotional state of patients and their relatives**
- **Students worked as support staff, nurses, they sorted medicines etc.**
- **After some days sick children were transported to Poland or other countries**

Sick children with oncology, nephrology and orphan diseases were evacuated to Lviv to the Western Ukrainian Children's Specialized Medical Center (WUChSMC)

In this way, 1460 seriously ill children were saved. Because in the conditions of continuous Russian shelling and missile strikes, it was impossible to provide full treatment in Ukraine

Ointments against burns and skin lesions, individual hemostatic (tourniquets) as well as hydrogel bandages are made in the laboratories of the University
